

FL-BSA Historical Measurement Report

Evidence mode: measure_real_model

Artifact status: unsigned measurement report; not a certificate or signed evidence bundle.

Measured output: supplied historical decision column historical_approved; authorship unspecified.

Favorable outcome definition: historical_approved == 1.

Decision provenance: origin=historical; authored_by=unspecified

Boundary and non-claims

This report contains aggregate measurement results only and no row-level borrower data.

FL-BSA did not execute a model.

FL-BSA did not execute a scorecard.

FL-BSA did not connect to production decision services.

FL-BSA did not make lending decisions.

FL-BSA did not override lending decisions.

This report is not legal advice, conformity assessment, regulator approval, certified compliance, release-grade external evidence, or customer-production go-live approval.

This PDF summarizes prepared input. For an offline review, read real_model_findings.md first for scope, decision meaning, preparation rules and planned comparisons.

Retain source/exclusion receipts separately; this PDF does not verify extraction.

Run ID: real-model-measurement

Measurement artifact created: 2026-10-16T04:16:26.036396Z

Manifest created: 2026-10-16T04:16:26.039247Z

Rows measured: 2079

Protected attributes: cohort

Decision origin: historical

Decision source column: historical_approved

Decision source kind: binary_output

FL-BSA scored decisions: false

Live decisioning: false

Favorable decisions: 1858

Favorable rate: 0.893699

Score threshold applied: false

Score threshold: not_available
